

OPTOMAP Digital Retinal Scan

Bayshore Ophthalmology offers a state-of-the-art digital scanning technology that allows us to view the inside of your eye *without* the use of dilation drops. The OPTOMAP allows our doctors to screen your retina for problems such as Macular Degeneration, Glaucoma, Retinal Holes, Retinal Detachments, Hypertensive / Diabetic Retinopathy and much more. The scanning system is completely safe for children and adults. It allows you the opportunity to see inside of your eyes just as the doctor sees it!

There is an additional fee of \$30.00 for the OPTOMAP scan. This scan is not covered by insurance.

Dilated Exam

1. Blurred near vision for 3-4 hours
2. Light sensitivity for 3-4 hours
3. Longer office visit to wait for drops to take effect
4. Only the doctor can see the retina

OPTOMAP Exam

1. No blurred vision
2. No light sensitivity
3. Scan takes less than 2 minutes
4. Digital image that can be reviewed / compared each year

*** The doctor may still recommend that you have your eyes dilated based on medical findings ***

_____ I elect to have a digital scan of my retina today (\$30.00). I may still need dilation.

_____ I prefer a dilated exam of my retina (no additional fee)
